

Configuratie van GitHub Actions

Om de GitHub Actions workflows te configureren voor een Python project met beveiligingstests, heb ik de volgende stappen uitgevoerd:

Repository en Branches:

Een nieuwe publieke GitHub repository genaamd secure-python-pipeline aangemaakt.

Twee branches aangemaakt: main en dev.

Python Project:

Een eenvoudig "Hello, World!" Python project opgezet in de dev branch.

GitHub Actions Workflows:

Een workflow bestand .github/workflows/ci.yml aangemaakt om verschillende beveiligingscontroles uit te voeren bij elke pull request en een wekelijkse scan.

Screens:

1 commit1 file changed1 contributor

Commits on Dec 19, 2024

testing ci/cdStanley committed 1 minute ago157cf9c

Showing 1 changed file with 1 addition and 0 deletions.

test.py

```
... 1 print("hello world")
2 print("this is a test for Secdev project")
3 #test ci/cd
4 + password = "123456"
5
```
